Executive summary

This document is the deliverable D20 "Training seminar for academics and research organisations" of project Hatemeter - Hate speech tool for monitoring, analysing and tackling Anti-Muslim hatred online, finalised within Activity 5.4 "Disseminating and communicating project information and results" of Workpackage (WP) no. 5 "Training, dissemination and sustainability strategy".

The training seminar for academics and research organisations has been held the **17th December 2019** at the **University of Toulouse**, Toulouse (France).

This deliverable provides a brief **overview of the Hatemeter project** and of the **training seminar**, with some **pictures** taken during the seminar. The documents contains the **agenda** of the event (Annex A) and the power point **presentations** (Annex B).

1. Introduction

Project "Hatemeter - Hate speech tool for monitoring, analysing and tackling anti-Muslim hatred online" aims at **systematising, augmenting and sharing knowledge of anti-Muslim hatred online,** and at increasing the efficiency and effectiveness of NGOs in **preventing and tackling Islamophobia** at the EU level, by developing and testing an **ICT tool (i.e., Hatemeter Platform)** that **automatically monitors and analyses Internet and social media data** on the phenomenon, and **produces computer-assisted responses and hints** to support **counter-narratives** and **awareness raising campaigns**.

More specifically, backed by a strong interdisciplinary effort (criminology, social sciences, computer sciences, statistics, and law), the Hatemeter Platform uses a combination of **natural language processing (NLP), machine learning, and big data analytics/visualization** to:

- A. identify and systematise in real-time actual "red flags" of anti-Muslim hate speech and/or possible related threats online (**Real-time Identification**);
- B. understand and assess the sets of features and patterns associated with trends of Islamophobia online (**In-depth Understanding**);
- C. develop an effective tactical/strategic planning against anti-Muslim hatred online through the adoption of the innovative Computer Assisted Persuasion (CAP) approach (**Tactical/Strategic Response**);
- D. produce an effective counter-narrative framework for preventing and tackling Islamophobia online and building knowledge-based and tailored awareness raising campaigns (**Counter-Narratives Production**).

The Hatemeter Platform has been **piloted and tested in three NGOs of EU Member States (MSs)** where the magnitude of the problem is considerable but no systematic responses have been implemented (**France, Italy and the United Kingdom**), thus enabling Project Hatemeter to address several objectives of the **Annual Colloquium on Fundamental Rights "Tolerance and respect: preventing and combating anti-Semitic and anti-Muslim hatred in Europe"** and the **European Agenda on Security** (2015), as well as the **priorities** of the REC call of proposals.

In order to strengthen **cooperation** between key actors and to ensure the **widest circulation** and **long term impact** of the project results on future research streams and operational strategies, the project favoured **capacity building and training** and the **sustainability and transferability** of the Hatemeter Platform among **other target stakeholder groups** (e.g., LEAs, journalists/media, etc.) across the EU and for **other forms of hate speech**, through the building of the **"EU laboratory on Internet and social media for countering online anti-Muslim hate speech"** (i.e., Hatemeter Lab).

2. Overview of the training seminar for academics and research organisations

The **Hatemeter Training seminar for academics and research organisations** has been held the 17th December 2019 at the "Salle des séminaires - Bibliothèque de l'Arsenal" Floor -1 of the Library of the Université Toulouse 1 Capitole 11 Rue des Puits Creuses, 31070 - Toulouse Cedex 07 (France).

The responsible partner of the event is **Université Toulouse 1 Capitole** that organised the event together with the **University of Trento** and the **Collectif contre l'islamophobie en France** (CCIF).

The one-day training seminar has seen the **participation of academics and researchers**, operating within and at the crossroads of the relevant disciplines (e.g., criminology, social sciences, computer science, statistics, law), from public and private organizations. The **aim** of the seminar was to supply detailed information on all the phases of the project, from the assessment of needs to reviewed state-of-the-art and the new knowledge and standards developed, in order to enable the recipients to assess the adopted methodology and the Hatemeter Platform, replicate it, or use the results for future research development or for industrial purposes (Training Module A; Hatemeter Lab meeting).

Fig. 1 – Overview of the project results, pilots and roundtable of the Hatemeter Lab: Mario Laurent (Université Toulouse 1 Capitole) and Serena Bressan (FBK).

The participants at the seminar received the deliverable "**D18** – **Training Module A**", designed to be used by academics and research organizations outside the Hatemeter project as a **manual** to understand the Hatemeter Platform's (also referred to as the Hatemeter Tool) main **goals**, how it **works** and what it can **achieve**.

Fig. 2 – Overview of the project results, pilots and roundtable of the Hatemeter Lab: Mario Laurent (Université Toulouse 1 Capitole).

Fig. 3 – Overview of the project results, pilots and roundtable of the Hatemeter Lab: Parisa Diba (Teesside University).

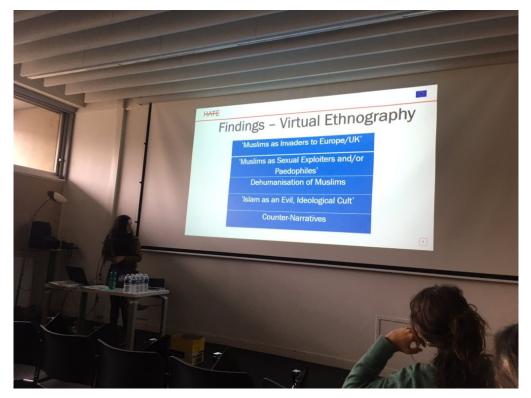

Fig. 4 – Overview of the project results, pilots and roundtable of the Hatemeter Lab: Daniela Andreatta (University of Trento) and Serena Bressan (FBK).

The **feedback collected** during the seminar will be fundamental to assess the sustainability and dissemination of the results of the Hatemeter project, as well as to understand how the methodology and the Platform can been employed by experts on the topic in further works and research.

Annex A

Agenda Hatemeter Training Seminar #1

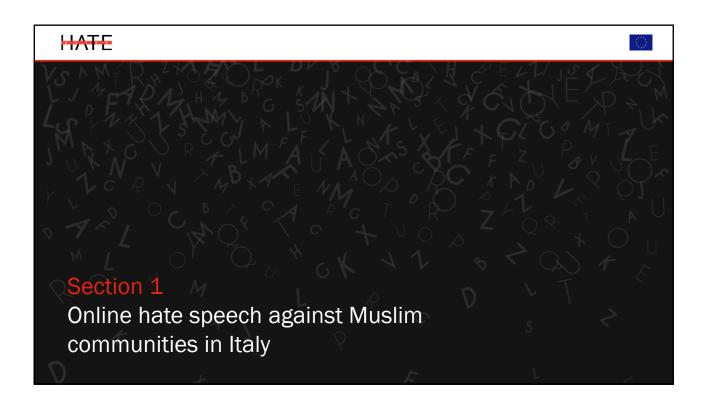

17 December 2019 Academics & Research Organisations

09.30 - 09.45	Registration of the participants
09.45 - 10.00	Welcome and presentation of the participants at the seminar (<i>Université Toulouse 1 Capitole</i>)
10.00 - 11.00	 Introduction of the Hatemeter project: aim, methodology and results (University of Trento and Fondazione Bruno Kessler) 1. The Italian Pilot: What is known about Islamophobia online // Effectiveness of the existing tools and techniques to fight against Islamophobia online (University of Trento) 2. The French Pilot: What is known about Islamophobia online // Effectiveness of the existing tools and techniques to fight against Islamophobia (Université Toulouse 1 Capitole) 3. The UK Pilot: What is known about Islamophobia online // Effectiveness of the existing tools and techniques to fight against Islamophobia (Teesside University)
11.00 - 11.15	Coffee break
11.15 - 11.45	Presentation of the Hatemeter platform (Fondazione Bruno Kessler)
11.45 - 12.30	Presentation of the analyses done in each pilot and added value of Hatemeter platform for academic research in Italy, France, and the UK (University of Trento, Université Toulouse 1 Capitole, and Teesside University)
12.30 - 13.00	Presentation of the three Hatemeter pilots by NGOs representatives in Italy, France, and the UK (Amnesty International – Italy, Collectif Contre l'Islamophobie en France, and Stop Hate UK)
13.00 - 14.00	Lunch
14.00 - 15.00	Work groups on the functioning of the Hatemeter platform and assessment of its efficacy and efficiency
15.00 - 15.45	Presentation of the results, suggestions, insights, recommendations by the work groups
15.45 - 16.30	Roundtable discussion on project Hatemeter: ideas for further research on comprehensive approaches
16.30 - 16.45	Open questions and discussion
16.45 - 17.00	Seminar review and closing

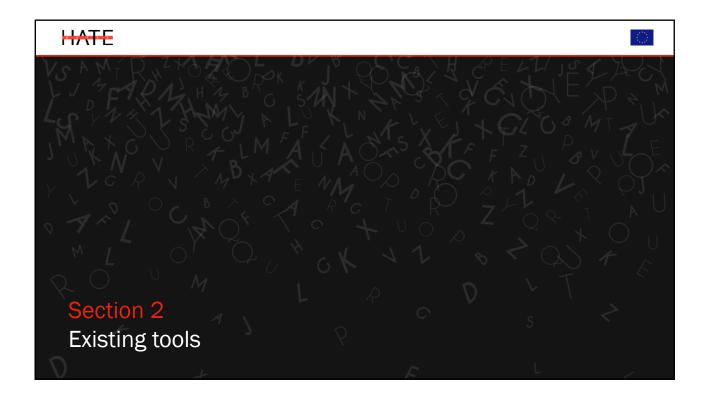

Annex B

Presentations

HATE Online hate speech against Muslim communities in Italy State of the art Fake news and inflammatory statements against Muslims are spread on the Internet and through social media platforms. A recent study on Islamophobia in Italy found an increase in hate speech against Islam from neofascist and Catholic fundamentalist groups (Aglietti and Padovan, 2018). Muslims are the fourth most targeted group on Twitter (Vox, 2019). Hate speech is soaring and with xenophobia, Islamophobia, anti-Semitism and racism, particularly as a result of both terrorist attacks and the migration flows. Anti-Muslim hatred is not confined to the virtual world, since the Internet and social media promote religious hatred and xenophobia that lead to crimes in the real world. They also favour a rise in political extremism: far-right groups and radicalisation • of (young) Muslim in response to messages of exclusion. з

Socio-legal background

Our subject of study is mainly related or affected by 3 important pieces of law

Law on « haine et incitation à la haine »

- Any hate speech, discrimination or violent against someone based on their ethnicity, religion, race or nationality is prohibited

- This also apply to writting discourses and to any public communication, including using electronic devices

"Ceux qui, par l'un des moyens énoncés à l'article 23, auront provoqué à la discrimination, à la haine ou à la violence à l'égard d'une personne ou d'un groupe de personnes à raison de leur origine ou de leur appartenance ou de leur non-appartenance à une ethnie, une nation, une race ou une religion déterminée, seront punis d'un an d'emprisonnement et de 45 000 euros d'amende ou de l'une de ces deux peines seulement."

"[...] soit par des discours, cris ou menaces proférés dans des lieux ou réunions publics, soit par des écrits, imprimés, dessins, gravures, peintures, emblèmes, images ou tout autre support de l'écrit, de la parole ou de l'image vendus ou distribués, mis en vente ou exposés dans des lieux ou réunions publics, soit par des placards ou des affiches exposés au regard du public, soit par tout moyen de communication au public par voie électronique [...]"

Law on « statistiques éthniques »

- It's forbidden to gather any ethnic or religious data without special agreement

- No racial studies (can make the evaluation of discriminations harder and assumption of the far right activist stronger)

Law on « laïcité » (laicity/securalism)

- Wearing any visible religious sign is prohibited to anyone working for the french state and in schools
- This law create debates and its interpretation by different political groups is still controversial

Epistemological issues

New laws and ambiguities

A new text of law was voted at Assemblée Nationale in July specifically addressing online hate speech. - incitation to hate, discriminate or commit violence, based on sex, sexual orientation, gender identity, disability, ethnicity, nationality, "race" or religion.

- social network has to delete it in less than 24hrs and replace it with a message indicating the removal.

During the debates at the Assembly, activists expressed some complaints on the text and asked to replace the term "Islamophobic" with "anti-Muslim".

- fear that "Islamophobia" could be use to prohibit any criticism of the religion itself.

- tension around the place of Muslims in French society.
- epistemological battles over terms qualifying the hatred of Muslims.

In 2017, the word "race" was removed from the constitution's Article 1 - viewed as a racist tool.

- question dividing researchers or citizens but the vote was unanimous.

→ racism based on biologic differences has been replaced by opposition between French culture and foreign culture, seen as invasive: "neo-racism" (Froio, 2018 ; Tahata, 2018).

HATE	
Other parameters	
Social network exchanges and media influence	
 Twitter mechanics also play a role in the form of hate speech. maximum size of tweets prevents the development of a constructed speech forces writers to be more concise and more divisive → Polarization of the exchanges between support and anti-Muslims groups The effectiveness of a tweet seems linked to its controversial nature (Longhi, 2017) 	
False news reached more people and spread faster than the truth (Vosoughi, Roy and Aral, 2018)	
 « Islamophobic controversies often started from social media before getting debated in mainstream media and triggering reactions among politicians. » (Faytre, 2019) → after a viral video posted on Twitter by a RN representant questionning place in society of women wearing th veil, continuous news channels in France have regularly debated this subject, during the month of October 2019 often receiving around 200,000 viewers → resulting in more online debates and hate speech 	ne

Section 2 Interviews and online observation

HATE

Interviews

Main results from the in depth interviews

All the interviewees were Muslim women, activists in three different associations

According to them and our observation, **anti-Muslim** hatred takes **two** main forms: - **Hate speech**, based on **prejudices associated** with Muslims or people of North African descent and culture

- Cyberbullying campaigns targeting publicly known and recognised Muslim personalities or any person who have been exposed in the media as Muslim

Online harassment undertakes the following path:

- a religious sign visible in the media is associated with a willingness of its bearer to proselytise
- \rightarrow proselytism for the Muslim religion is associated with extremist branches

 \rightarrow these extremist branches are then associated with the jihadists \rightarrow and finally with ISIS and terrorist attacks

After being identified by a group, the **victims** can be **pursued relentlessly** by comments under their profiles, publications or by private messages.

They can receive « simple » insults to death threat.

Online observations

The three main groups producing anti-Muslim hate speech

 \rightarrow Far right groups, called « Fachosphère », includes political parties, other official

groups as well as other individuals (Rassemblement National, FdeSouche, Génération Identitaire...)

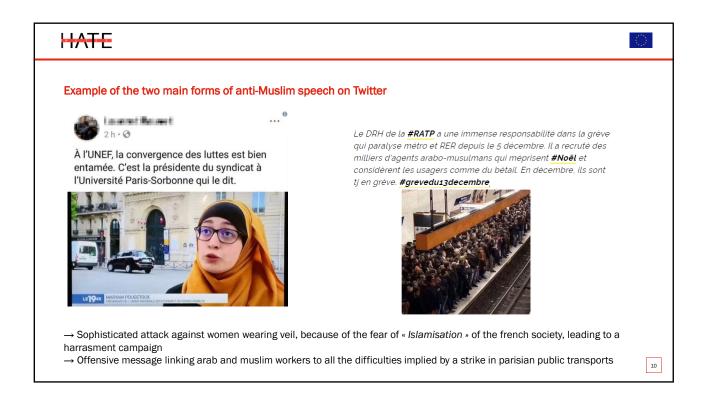

Their discourse relates many societal problems to immigration and « choc des cultures » (cultural clash)

Some of them argue that they fight for the **common good**, including their target populations (Muslims), who would supposedly lives better if they leave France or if they adopt French culture.

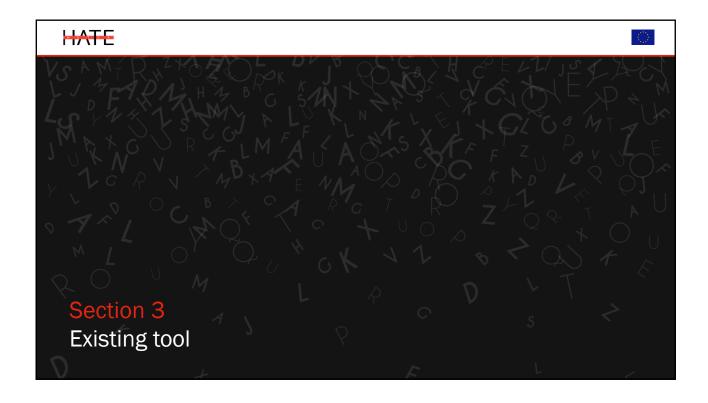

Their speeches defy the presence of Muslims in public space on the pretext that they must respect the historical right to govern and to speak in public held by Judeo-Christian white culture

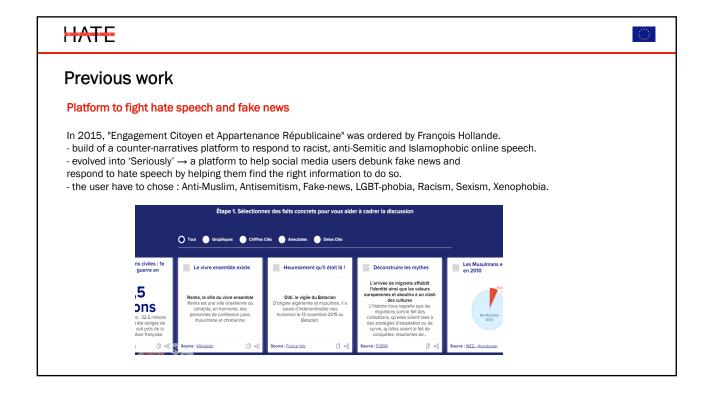

→ « Laïcistes » (secularist claimants), often politically affiliated with a left-wing party (intelectuals, journalists...) They claim an **extreme** interpretation of **secularism** such that no sign or religious claim should be tolerated in the public space (including the streets and media)

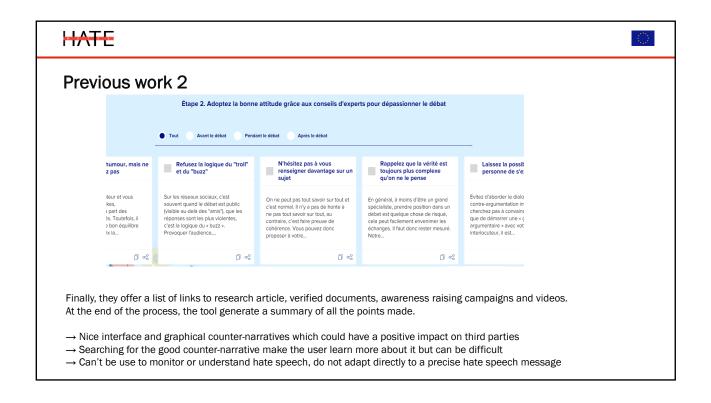

This group has the most **sophisticated** discourse in which hate speech is **subtle** when existent. They can launch **harrasment campaigns** aim to target Muslim personalities in order to **silence them.**

question client : bande de pourrie l argent n a pas d'odeur vous trahissez les valeurs de la république française honte a vous vous contribuez a l invasion islamiste vous finirez avec, cette racaille dans les fours en Pologne Magasin concerné : Reference et nom du produit : eivilite : Homme	

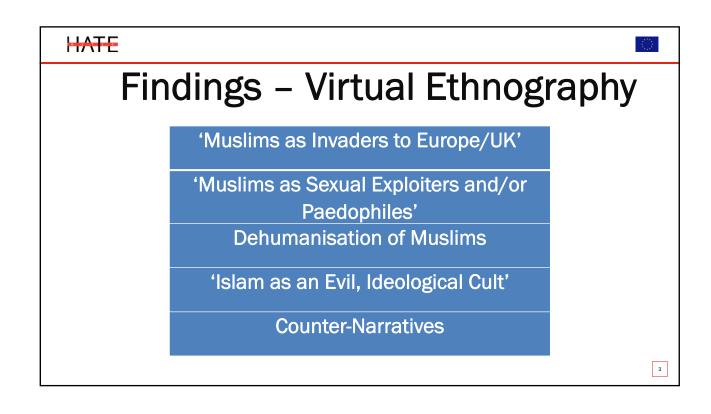

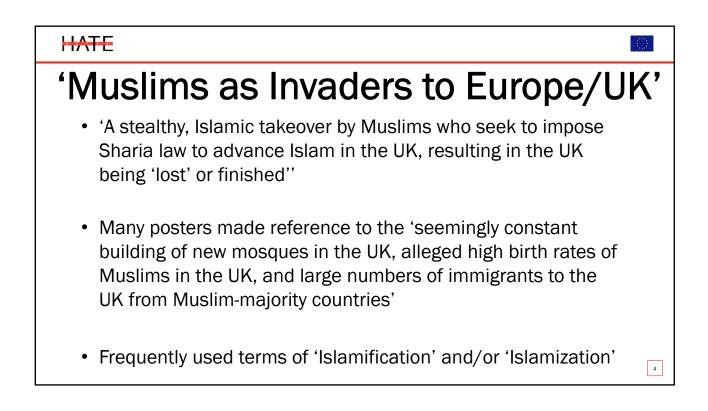

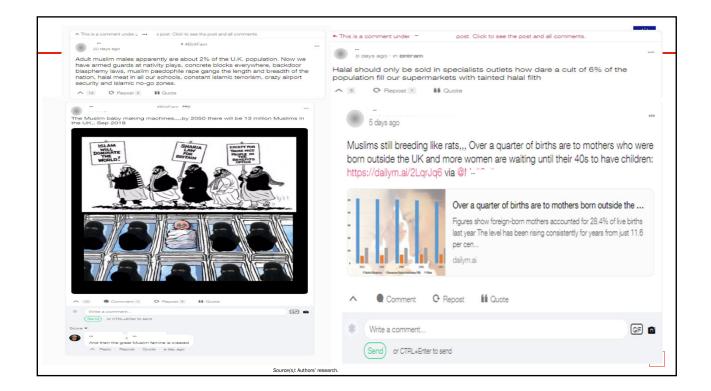

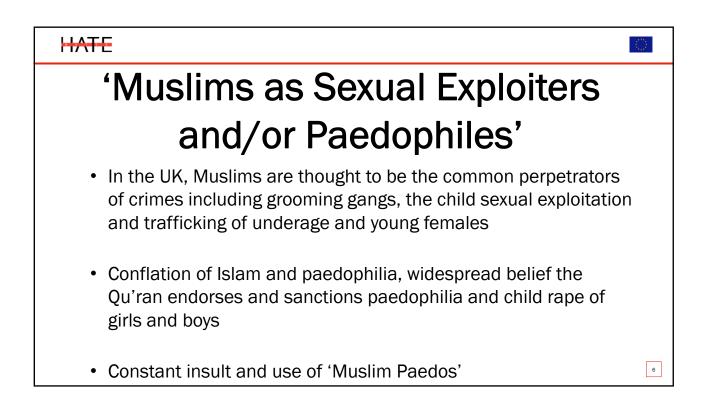

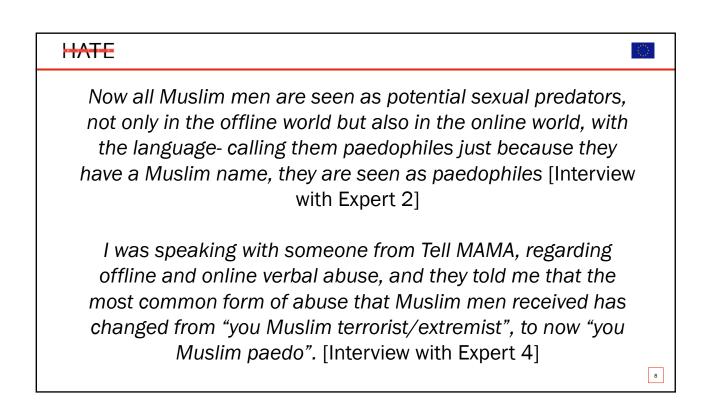

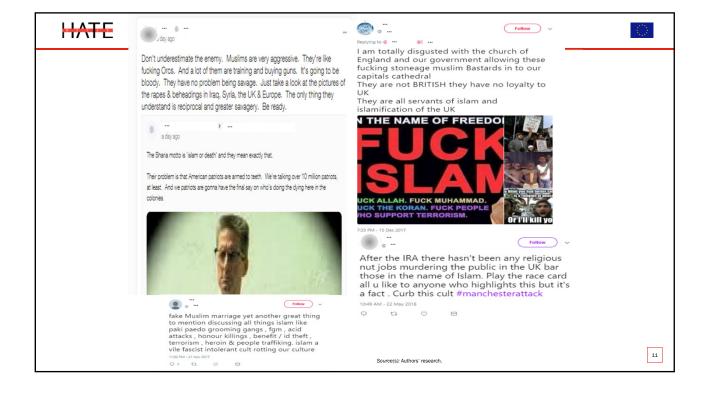

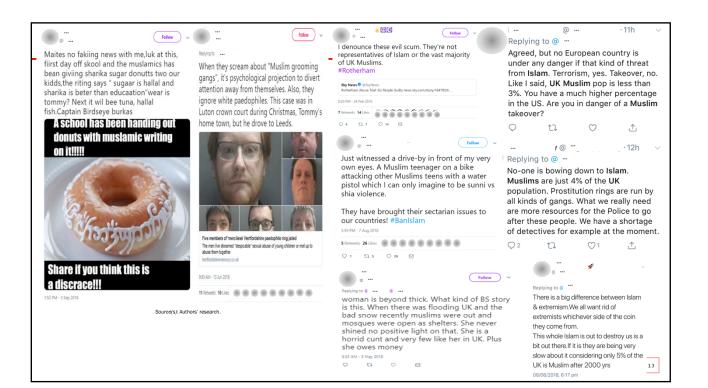

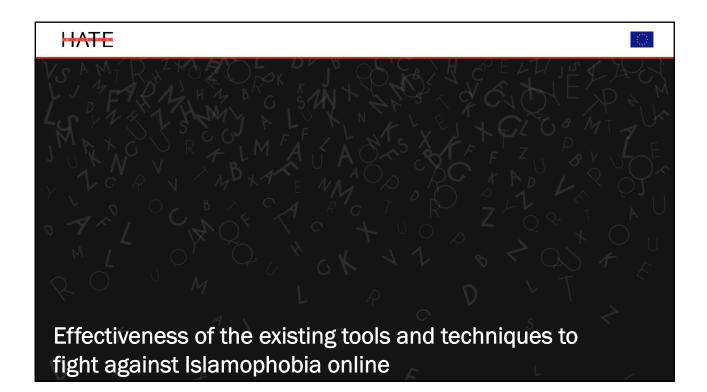

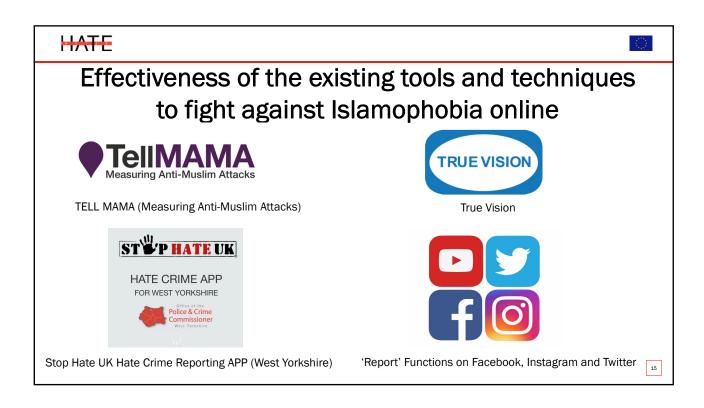

HATE	$\langle \bigcirc \rangle$
'Islam as a Cult, Not a Religion'	
 'Islam is not a religion, it is instead a monolithic 'death cult' that is intent on slaughtering non-Muslims in the U and wider Europe, taking over countries in the latter region' 	К
 'Muslims are mindless followers, intolerant evil, barbari prone to violence and possess paedophilic and rapist tendencies towards women and children' 	C,
 'Incompatibility of Islam and Muslims in the UK' 	10

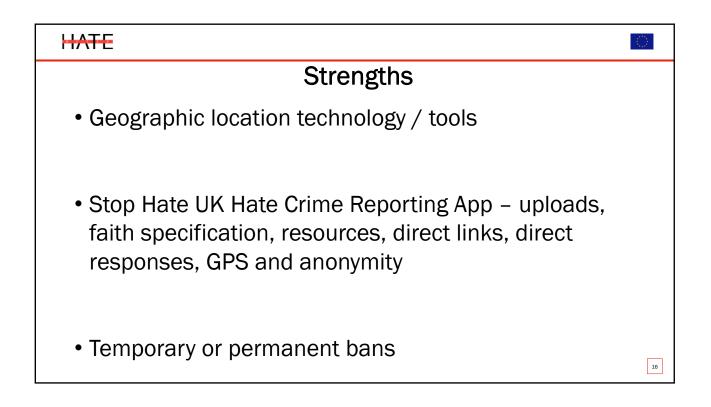

HATE	
Counter-Narratives	
 Instances of counter-narrative activity on various platforms dispelling negative myths and stereotypes about Islam and Muslims 	
 Mix of ordinary social media users and organisations 	
 Somewhat prevalent is the creation of parody accounts that use humour to negate and mock negative misconceptions of Islam by actively engaging with Islamophobic users in 'real-time' 	12

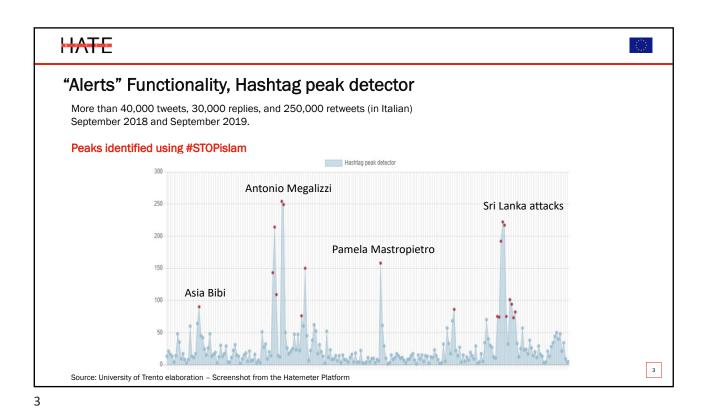

Weaknesses

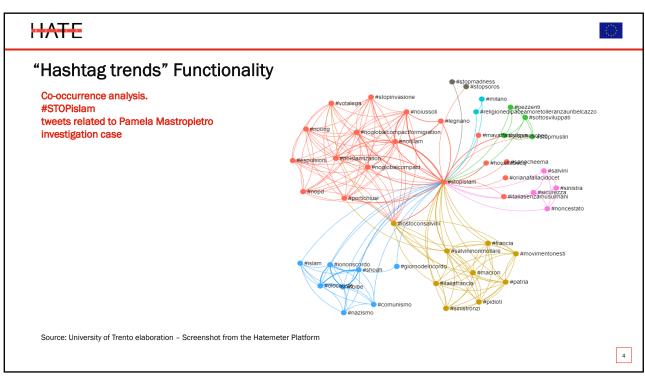

- Time-consuming
- 'Free speech' and censorship issues
- Challenges of identifying hate speech on platforms
- Creativity and ingenuity of perpetrators
- Difficulties for law enforcement

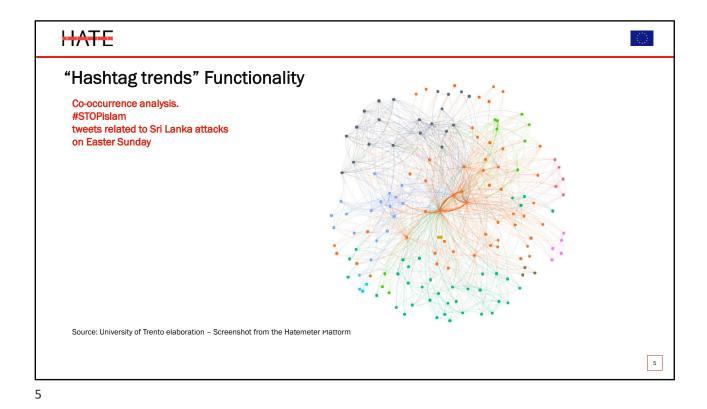

17

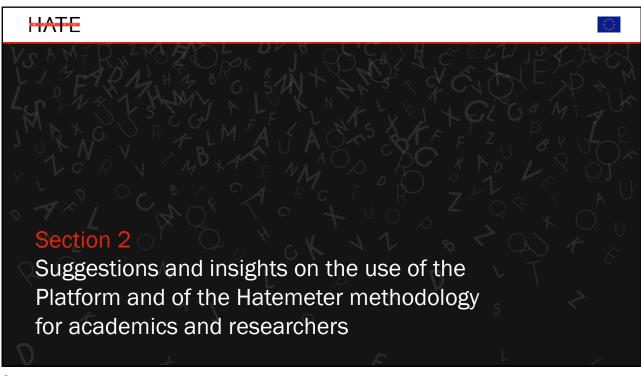

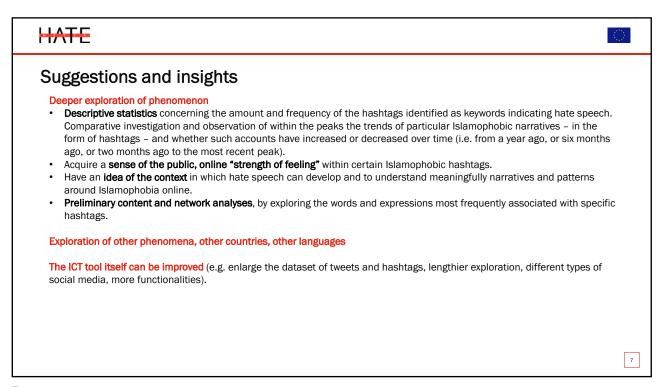

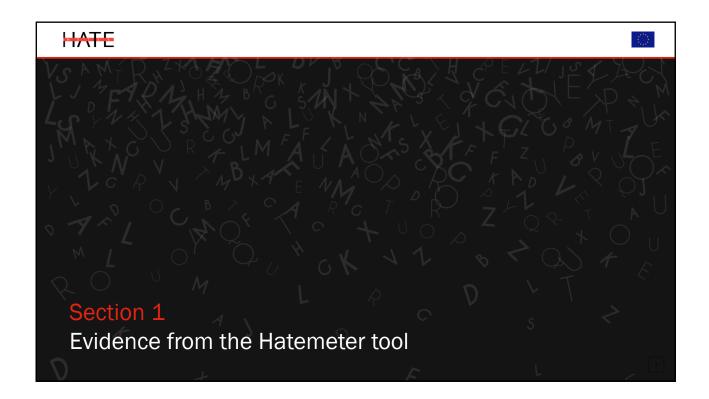

One way to use the Hatemeter Platform

From large scale monitoring to qualitative analysis

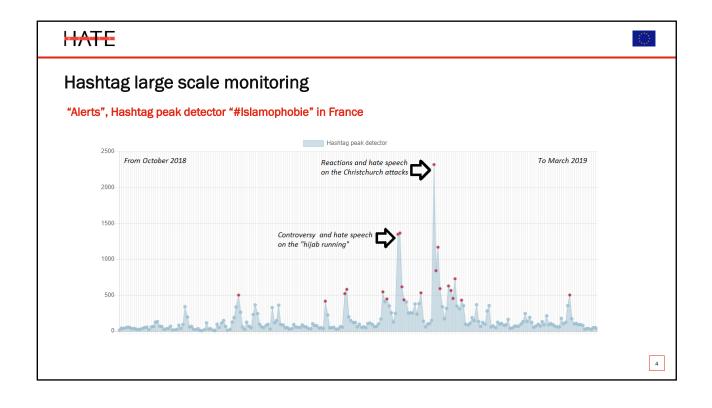

- Use the « Alerts » function on a Hashtag you want to study to detect a peak of islamophobia, and record the timespan concerned by this peak.

- Use the « Hashtag trends » function, chosing the same Hashtag and the previous time-span of interest.

 \rightarrow read the most re-tweeted tweets in the list to understand which event produced the peak and how it was discussed on Twitter.

Use the « Hate Speakers » function on the **same Hashtag** and **same time-span** in order to know who are the biggest influencers.

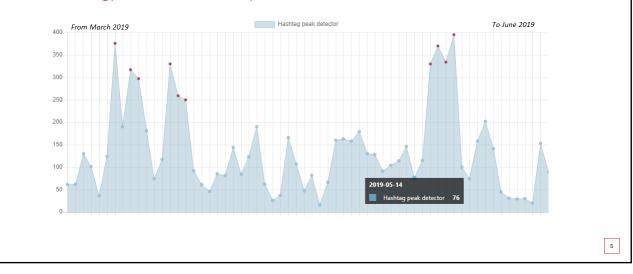

Understand how the users linked to this tweets are related to each other (Same group ? Same interest?) by looking at the hate speaker's cooccurrence graph and by clicking the name of the Hate Speaker to track back their actual Twitter account.

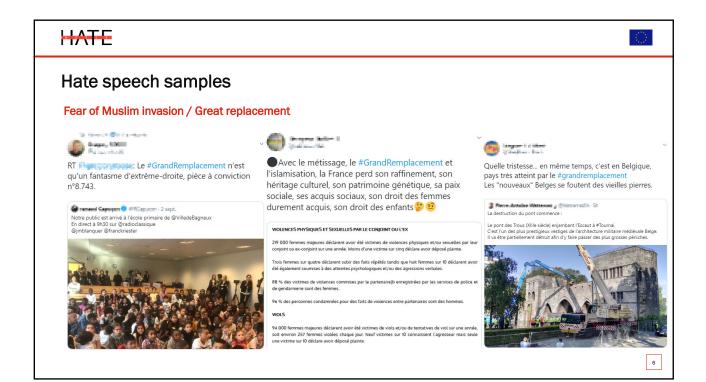

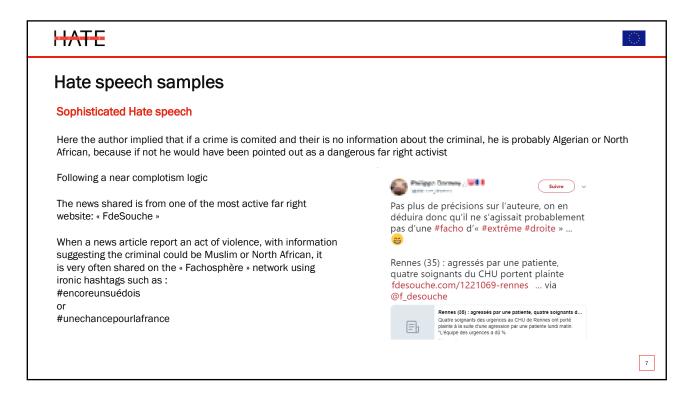

з

Hashtag large scale monitoring

"Alerts", Hashtag peak detector "#GrandRemplacement" in France

Using the Hatemeter tool

Limits and benefits

It is difficult to capture every hate speech through the search for keywords or hashtags

- \rightarrow Twitter users do not want to be legally concerned
- \rightarrow They will often resort to a **subtle and sophisticated** speech

 \rightarrow Their message can be claimed **politica**l. It can claim **common sense**, state a **"fact**", it can take the **form** of a **warning** against danger, or it can pretend to be a simple **informative** remark, which in fact is **hidding an**

ideology

However, there is also a phenomenon well captured with our methodology :

- \rightarrow Tweets with an **« innocent »** content followed by some hashtags
- \rightarrow This tweets make **not much sense** unless we can understand what the hashtags refered to
- \rightarrow Those relate to a specific **network** and gives them a political or ideological **affiliation**

Our methodology allows us to regularly **discover new hashtags** and **expand** our keyword and hashtag **samples** : "Cespaslislam", #reveilezvous, #resistantspourlafrance, #renaissancefrançaise, #remigration, etc

HATE			0

Counter-narratives

Not efficient?

After the first phase of **counter-narratives collection** in France, we ran some **tests** with the Hatemeter tool to see if the counternarratives were **correctly assigned** to hate speech Tweets

In fact the **algorithm** was **working well** to assign a **pertinent** counter-speech to a hate speech but the **counter-speech** database **itself** was including some **inneficient** or sometimes **controversial** discourses:

- ungrammatical/bad written

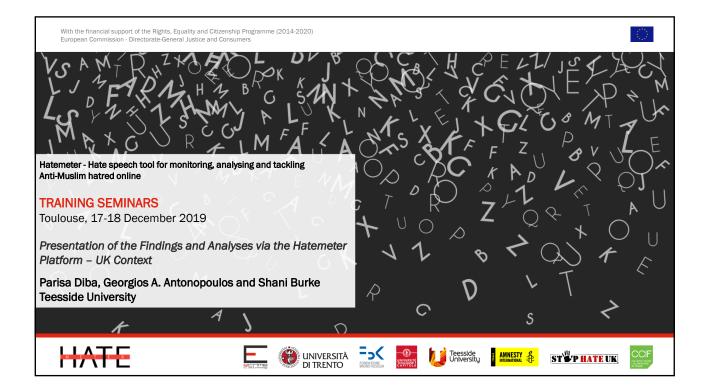

- no context/no content (messages like "not at all" or "you can't say that")

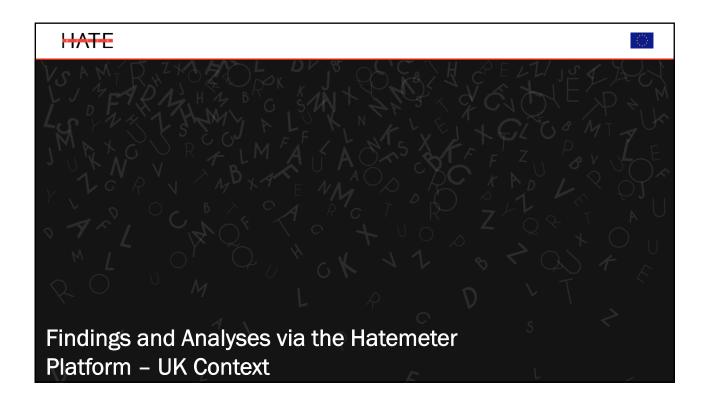

- too hostile or too emotional (sometimes insulting back in response to an insult message or comparison between religions to say than one is not better than the other)

- too religious or controversial (for example: "Islam is universal" which can make haters against muslim even more angry, or "vieil is an obligation for muslim women" which seems a controversial assumption and not really a solid point to make hate speech decrease)

 \rightarrow Operators have to be train/follow a formation to write counter-narratives Sometimes, being a victims of hate speech make it harder to respond efficiently to this hate speech

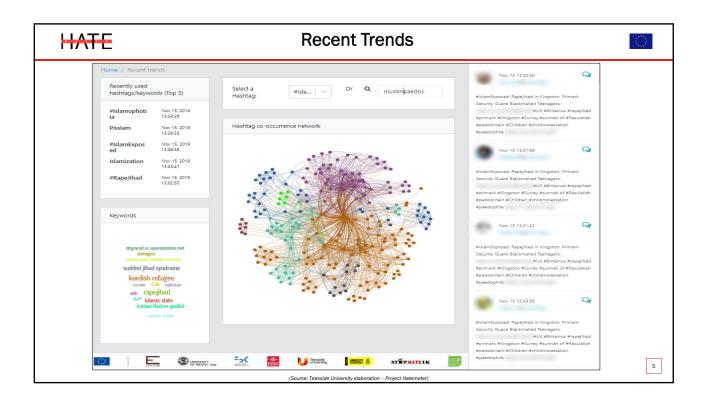

11

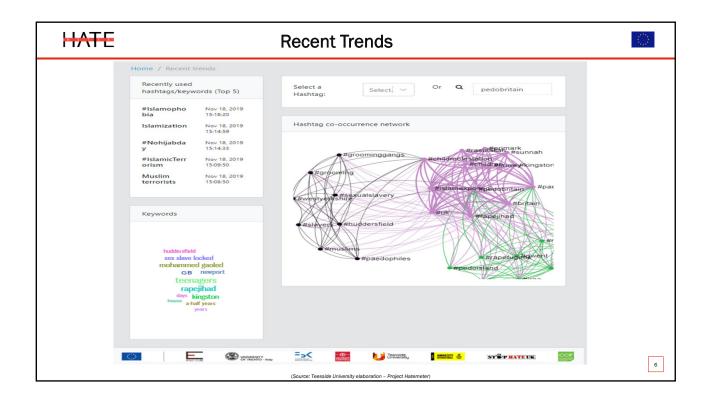

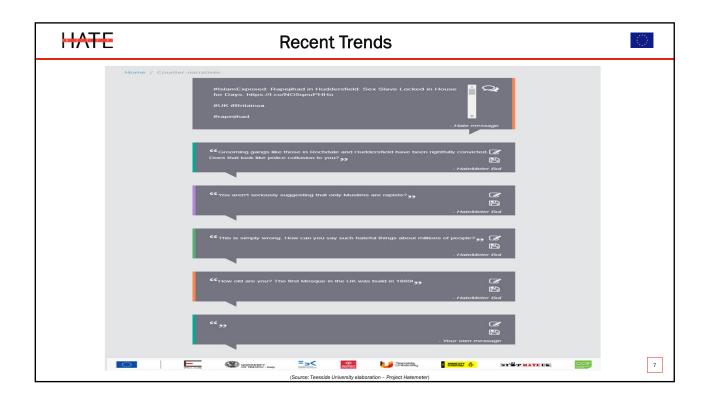

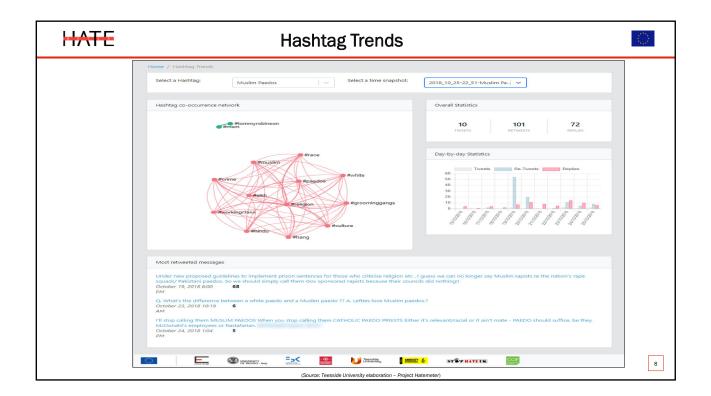

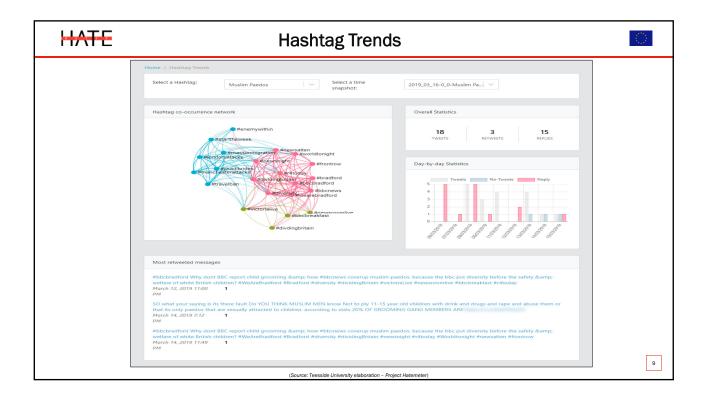

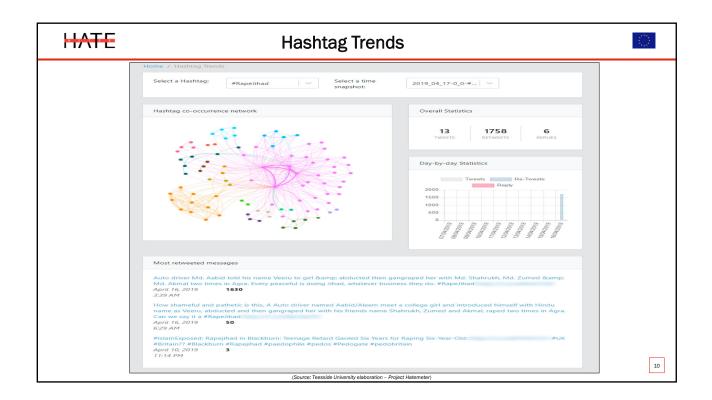

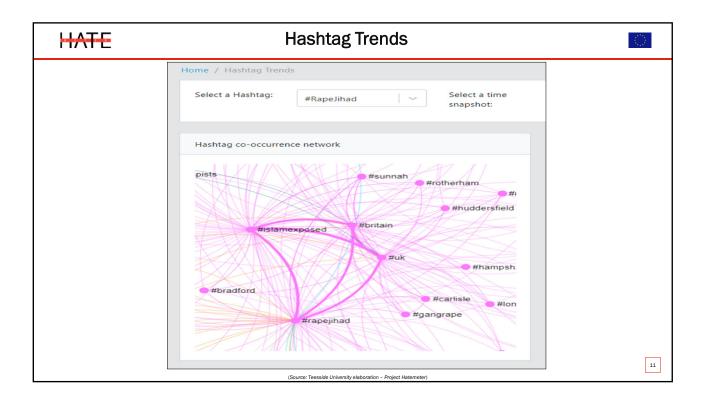

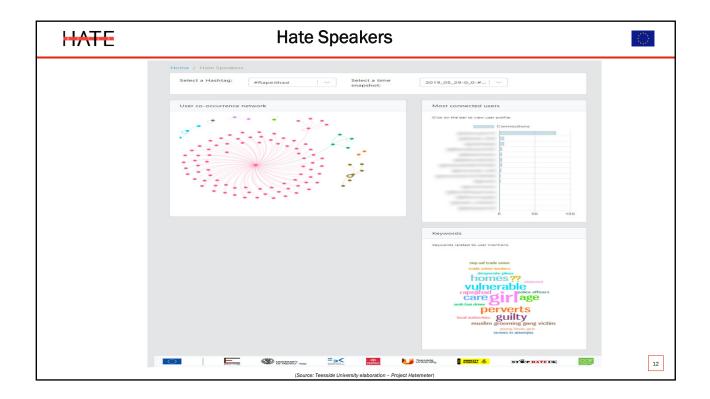

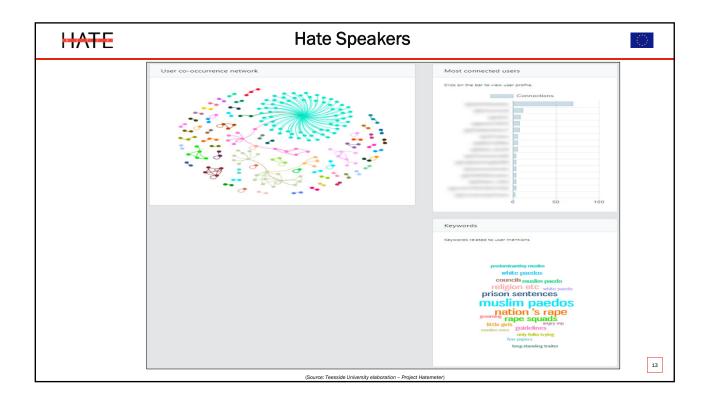

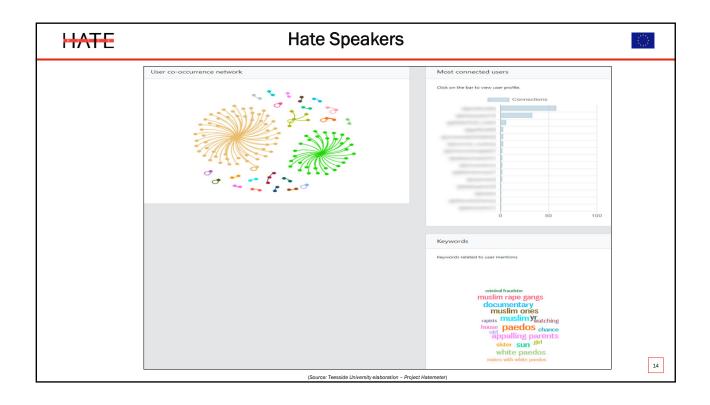

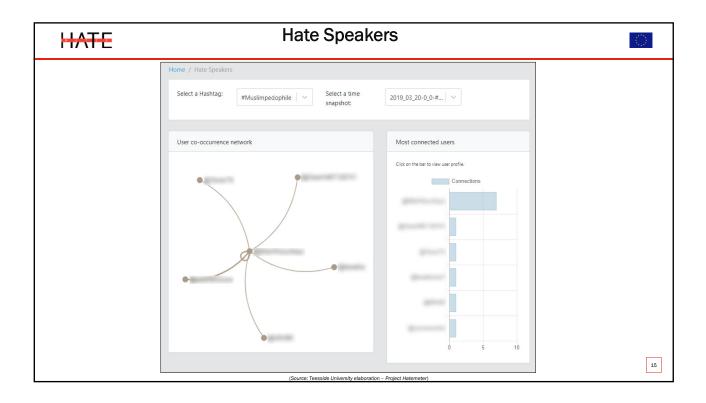

HATE	
Hatemeter Platform and Amnesty International Task Force	
Hate Speech	
The Collaboration	
Amnesty International Italy tested the Hatemeter Platform during the two Piloting Sessions thanks to the project called "Task Force Hate Speech":	
1 Pilot (from January to March 2019)	
Projects' aknowledgement Data collection	
 2 Pilot (from June to September 2019) Training and testing 	
- Platform evaluation	
	F
	:

Task Force Hate Speech

The Project

The Task Force Hate Speech is a project formed by motivated, skilled and trained activists.

Main objectives

- reduce the level of hate in the conversation
- spread impartial and objective information

Actions

- monitoring, contrasting and preventing the spread of online hate speech.
- acting in conversations where the level of discrimination and hatred is unacceptable.

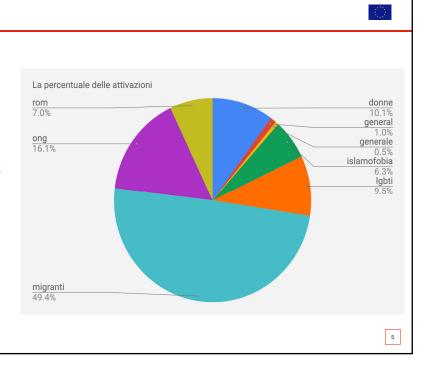

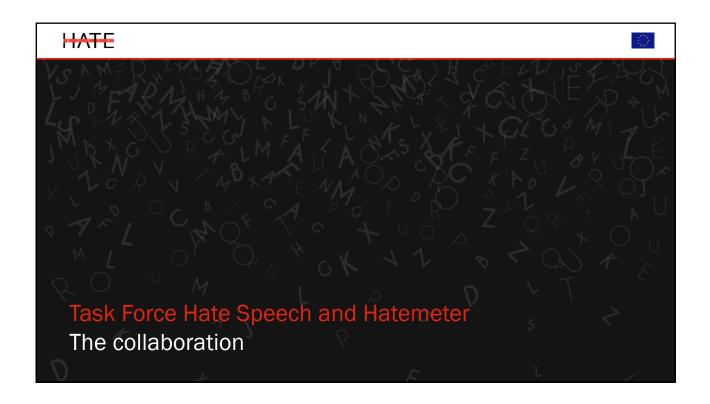

Task Force Hate Speech

The Project

The main targets of online hate speech in Italy are the categories of migrants and refugees, solidarity, the LGBTI category and Islam.

Islamophobic speeches represent 6% of task force's activations,

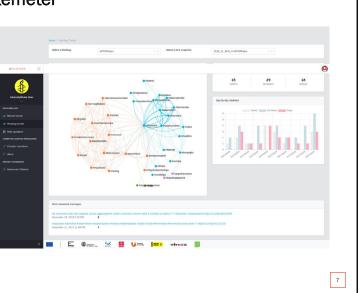

Task Force Hate Speech and Hatemeter

The Collaboration

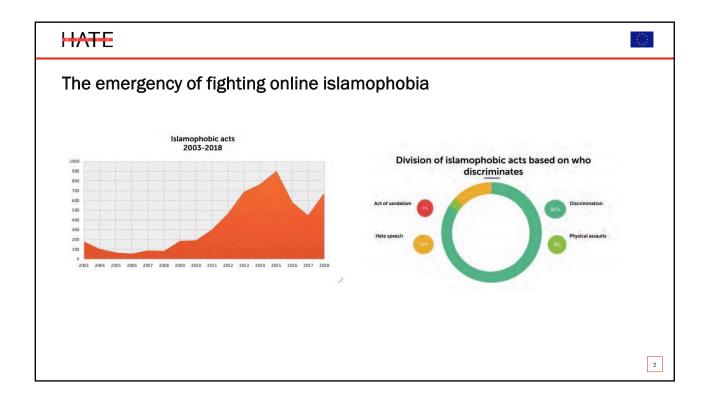

Amnesty International Task Force Hate Speech started working jointly with the Project Hatemeter focusing on the contrast of the online Islamophobia.

The collaboration started in the training sessions and continue during the piloting of the Hatemeter Platform, as well as in the development of the awareness raising campaign.

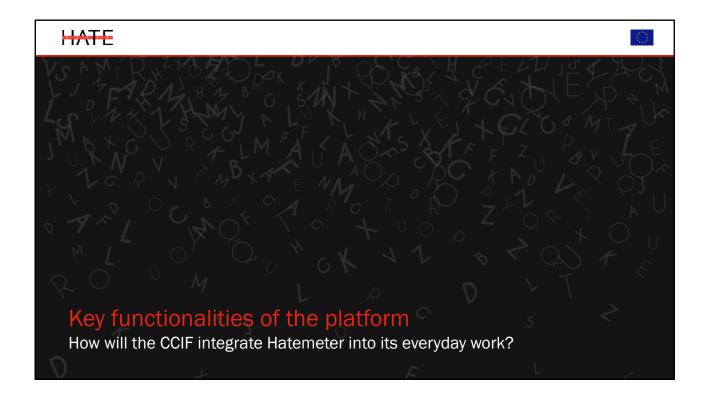

The Task Force gave support to the creation of the Hatemeter Platform by providing examples of hate speech and Islamophobic discourse followed by counter narrative examples.

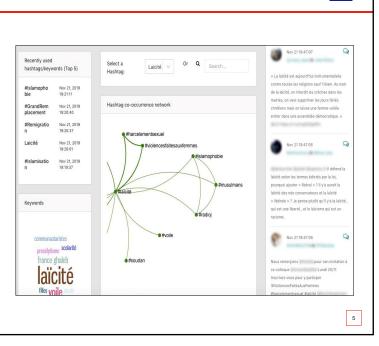

<section-header><image><image><section-header><section-header><text><text><text><text>

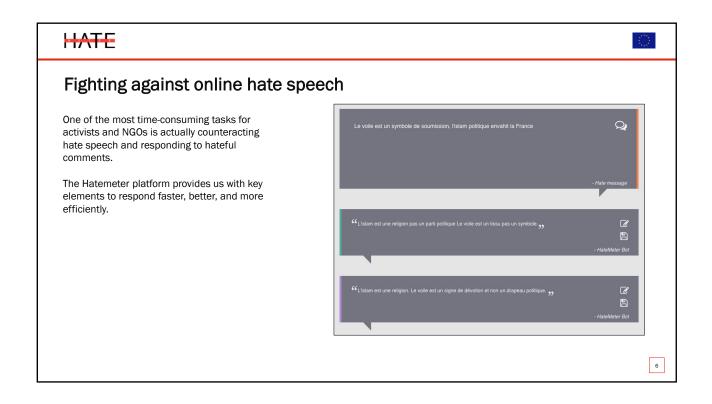

Real time data acquisition

The Hatemeter platform provides concrete evidence and proof of the concepts used by Islamophobia, by showing the use of these concepts in islamophobic tweets. Ex: laïcité

If an activist needs to analyse how a concept is being used, he or she will have real time access to such information by simply searching its corresponding hashtag in the toolbar.

HATE
UK Pilots in Context:
Points to note:
 Stop Hate UK is an established 'Hate Crime' organisation, providing 24/7 'third party' (independent) reporting facilities in 'commissioned areas' across the UK.
 We routinely receive reports of online Islamophobia from members of the public, both as 'victims' and 'bystanders', which are also used to identify potential 'targets' for both reporting and counter messaging by staff and volunteers involved in our 'No HateSpeech' team.
• In testing the Hatemeter Platform, we are operating within a project established in 2016 , with pre-existing practices and methodologies. Inevitably, we have not relied solely upon usage of the Platform as our primary mechanism for identifying and responding to instances of online Islamophobia.
2

UK Pilots

Positive Experience of deployment:

- As an exceptional training tool
- Enabling volunteers & staff members to quickly and accurately identify sources of Islamophobic hate speech on Twitter.
- The ability to view various user networks, including central users and 'seed' accounts.
- Confirmation and representation of the international /transnational aspects and interrelationships of online Islamophobia.
- Counter message generation as a effective catalyst (for further refinement of a 'bespoke' response).
