Executive summary

This document is the deliverable D28 “Dissemination event” of project Hatemeter, finalised within Activity 5.4 “Disseminating and communicating project information and results” of workpackage (WP) no. 5 “Training, dissemination and sustainability strategy”.

Hatemeter has been nominated as partner of the 22nd edition of “Voci per la Libertà – Una canzone per Amnesty” (“Voices for Freedom – A song for Amnesty”), a festival that combines music and human rights. It took place from 18th to 21th July in Rosolina Mare (Rovigo, Italy - https://www.vociperlaliberta.it/) with the participation of the Hatemeter partners during the two final days of the Festival. Hatemeter researchers, NGOs operators and volunteers participated in the event, where they illustrated the preliminary results of the project during both a conference and poster sessions. An awareness raising campaign video (in English, France, and Italian - see D22 at M23) aimed at preventing and combating online hate speech/crime against Muslims has been filmed during this event. This video shooting has been carried out by UniTrento and the three NGOs, with the support of SSH and ICT researchers involved in the project. In particular, we will produce a video-debate between partners, stakeholders and Hatemeter testimonial/s (e.g. musicians, artists, actors committed to preventing and combatting any adverse human rights impacts) on the contents collected within the above dissemination event, to reach different target groups in the three pilot countries (Italy, France and the UK) and also at the EU level, thus motivating the viewers to take action and play their part in raising awareness of the above phenomenon (see D22 at M23 within WP5).

This deliverable describes the context and background in which the dissemination event was carried out. After a description of the characteristics and the activities of the event per se, the deliverable describes when, where and how the Hatemeter activities have taken place, as well as the number of people participated in the dissemination. Annex A includes the dissemination event schedule for Hatemeter partners who participated in the event.
1. Introduction

Project “Hatemeter - Hate speech tool for monitoring, analysing and tackling anti-Muslim hatred online” aims at systematising, augmenting and sharing knowledge of anti-Muslim hatred online, and at increasing the efficiency and effectiveness of NGOs in preventing and tackling Islamophobia at the EU level, by developing and testing an ICT tool (i.e., Hatemeter platform) that automatically monitors and analyses Internet and social media data on the phenomenon, and produces computer-assisted responses and hints to support counter-narratives and awareness raising campaigns.

More specifically, backed by a strong interdisciplinary effort (criminology, social sciences, computer sciences, statistics, and law), the Hatemeter platform uses a combination of natural language processing (NLP), machine learning, and big data analytics/visualization to:

A. identify and systematise in real-time actual “red flags” of anti-Muslim hate speech and/or possible related threats online (Real-time Identification);

B. understand and assess the sets of features and patterns associated with trends of Islamophobia online (In-depth Understanding);

C. develop an effective tactical/strategic planning against anti-Muslim hatred online through the adoption of the innovative Computer Assisted Persuasion (CAP) approach (Tactical/Strategic Response);

D. produce an effective counter-narrative framework for preventing and tackling Islamophobia online and building knowledge-based and tailored awareness raising campaigns (Counter-Narratives Production).

The Hatemeter platform will be piloted and tested in three NGOs of EU Member States (MSs) where the magnitude of the problem is considerable but no systematic responses have been implemented (France, Italy and the United Kingdom), thus enabling Project Hatemeter to address several objectives of the Annual Colloquium on Fundamental Rights “Tolerance and respect: preventing and combating anti-Semitic and anti-Muslim hatred in Europe” and the European Agenda on Security (2015), as well as the priorities of the REC call of proposals.

In order to strengthen cooperation between key actors and to ensure the widest circulation and long term impact of the project results on future research streams and operational strategies, the project will favour capacity building and training and the sustainability and transferability of the Hatemeter platform among other target stakeholder groups (e.g., LEAs, journalists/media, etc.) across the EU and for other forms of hate speech, through the building of the “EU laboratory on Internet and social media for countering online anti-Muslim hate speech” (i.e., Hatemeter Lab).
2. Voci per la libertà: Context and background

This section describes the context and background of the event "Voci per la Libertà – Una canzone per Amnesty" (“Voices for Freedom - A song for Amnesty”), during which several dissemination activities concerning the Project Hatemeter took place and the video for the WP5 awareness-raising campaign was filmed.

2.1 “Voci per la Libertà - Una canzone per Amnesty” Festival

Founded in 1998, "Voci per la Libertà – Una canzone per Amnesty" is an annual music competition that aims to increase respect for human rights through music and is promoted by Amnesty International Italy¹ and the Associazione Culturale Voci per la Libertà². Having achieved considerable relevance at national level, in 2010 the festival was awarded by the Former President of the Italian Republic (Giorgio Napolitano) with the “Representative Presidential Medal”, and was supported by the Commissioner for Human Rights of the Council of Europe (Thomas Hammarberg).

The most important prizes awarded during the event are the followings:

- **Amnesty International Italy Award**, i.e. the best song promoting human rights and performed by well-known artists at a national level. This prize is awarded by a commission composed by relevant stakeholders (i.e. journalists, radio speakers, TV hosts, university professors, members of Amnesty International and of the “Associazione Culturale Voci per la Libertà”) evaluating the songs produced in the previous year that address this topic. Every year, the winner of the prize performs during the final evening of the festival. The artists awarded since 2013 are the followings: Daniele Silvestri (with the song “Il mio nemico”), Ivano Fossati (“Pane e coraggio”), Modena City Ramblers (“Ebano”), Paola Turci (“Rwanda”), Samuele Bersani (“Occhiiali rotti”), Subsonica (“Canenero”), Vinicio Capossela (“Lettera di soldati”), Carmen Consoli (“Mio zio”), Simone Cristicchi (“Genova brucia”), Fiorella Mannoia and Frankie HI-NRG (“Non è un film”), Enzo Avitabile and Francesco Guccini (“Gerardo nuvola e povere”), Max and Francesco Gazzè (“Atto di forza”), Mannarino (“Scendi giù”), Edoardo Bennato (“Pronti a salpare”), Nada Malanima (“Ballata triste”), Brunori Sas (“L’uomo nero”), and Roy Paci (“Salvagente”). **Roy Paci** is the winner of the Amnesty International Italy Award 2019 with his song “Salvagente” (i.e. life jacket; written and performed with the Italian rapper Willie Peyote) about anti-migrant hate speech online, counter-narratives and anti-discrimination. For this reason, he has been chosen as Hatemeter Testimonial (see the music video on YouTube: https://www.youtube.com/watch?v=XRahv7FByXw). For further information, please visit the following website (Italian only) https://www.vociperlaliberta.it/festival/premio-amnesty-italia.

---

¹ Amnesty International Italy is a national Section of the Amnesty International movement: a worldwide movement of people with more than 2 million members and subscribers in more than 150 countries and regions who campaign for internationally recognised human rights for everyone. Its vision is for every person to enjoy all the human rights enshrined in the Universal Declaration of Human Rights and other international human rights standards. Its mission is to conduct research and take action to prevent and end grave abuses of all human rights, be they civil, political, social, cultural or economic. Amnesty International Italy was formed in 1976. It is based in Rome (Italy) and is legally autonomous. It regularly coordinates and develops human rights campaigning and actions undertaken by Amnesty International members and human rights activists within the country. It is registered in Italy and has its own governance and management structures, statutes and audited accounts. Amnesty International Italy is one of the main partners of Project Hatemeter.

² The Associazione Culturale Voci per la Libertà is an Italian association created in 2003 and is made up by volunteers committed to the promotion of human rights through musical culture and youth aggregation. The association, in addition to the festival “Voci per la Libertà - Una canzone per Amnesty”, has created many cultural and musical events throughout Italy, favouring the expansion of a culture of respect and tolerance.
• **Amnesty International Italy Award - Emerging Artists**, i.e. the best song promoting human rights and performed by Italian emerging artists (under 35). During the last days of the festival "Voci per la Libertà – Una canzone per Amnesty", 8 singers and bands (selected among more than 100 artists from all over Italy) are evaluated in a 3-day competition by a commission of experts and journalists (e.g. newspaper, radio, and television). The final contest takes place during the last evening of the festival before the performance by the winner of the “Amnesty International Italy Award” (see above). The winner is entitled to a range of prizes, including the production of a video clip and, together with the other finalists, the inclusion in a music album together with the wide distribution through Amnesty’s channels. For further information, please visit the following web page (Italian only): https://www.vociperlaliberta.it/festival/premio-amnesty-emergenti.

Beside the music competition, other activities took place during the festival, such as laboratories for children, art expositions, conferences and round tables, informative hubs, etc. For further information, please visit the official website of “Voci per la Libertà – Una canzone per Amnesty” (Italian only): https://www.vociperlaliberta.it/.

2.2 The 22nd edition of the Festival

The 22nd edition of the festival “Voci per la Libertà – Una canzone per Amnesty” took place in Rosolina Mare (Rovigo, Italy) from the 18th to the 21st of July 2019. During this edition, Hatemeter has been a partner of the event during which several dissemination activities (i.e. conference, info point) and the shooting of the awareness raising campaign video concerning the Project have been undertaken (for further information, please see Section 3). The slogan of the 2019 edition of “Voci per la Libertà – Una canzone per Amnesty” was “Sui diritti umani non si torna indietro” (i.e. “Do not go back on human rights”), a slogan that for Amnesty is a real emblem given the daily commitment to guarantee human rights. During the event, in addition to concerts, art exhibitions, workshops for children, round tables, conferences and educational stands were held (see below; Fig. 1, Fig. 2 and Fig. 3).

*Fig. 1 - Banner of Hatemeter displayed on the main stage of the event “Voci per la Libertà – Una canzone per Amnesty” 2019.*
Fig. 2 - Art exposition during the 2019 edition of the festival “Voci per la Libertà – Una canzone per Amnesty”.

Fig. 3 - Workshops for children during the 2019 edition of the festival “Voci per la Libertà – Una canzone per Amnesty”.
3. Voci per la libertà: Hatemeter dissemination activities

This section outlines the dissemination activities concerning project Hatemeter carried out during the festival “Voci per la Libertà – Una canzone per Amnesty” 2019. During (only) the final day of the Festival (July 21\textsuperscript{st}, 2019), over 600 people (i.e. general public, journalists, human right activists) attended the concerts, art exhibitions, workshops for children, round tables, conferences and educational stands.

3.1 Public conference

Project Hatemeter was presented during the public conference held on the 21\textsuperscript{st} of July (h. 6.30-8 pm) in Rosolina Mare (Rovigo, Italy) during which the “Amnesty International Italy Award” 2019 was delivered to the famous Italian musician and Hatemeter Testimonial Roy Paci. The speakers were: Riccardo Noury (Amnesty International Italy Spokesman), Roy Paci (Hatemeter Testimonial and Amnesty International Italy Award 2019), Michele Lionello (“Voci per la Libertà” Team Manager), Franco Vitale (Major of Rosolina), Francesca Cesarotti (Amnesty International Italy), Elisa Martini (UniTrento) and Sara Tonelli (FBK).

In more detail (see Fig. 4 below), the project was introduced by Francesca Cesarotti (Amnesty International Italy) during the conference, with a general presentation on the current context and trends of hate speech against Muslims that can be found online, and on the strengths and weaknesses of the cooperation among NGOs, universities and research institutions in this field. Secondly, Elisa Martini (UniTrento) provided information on the project and its objectives, as well as its main preliminary results (see the already submitted deliverable D7 of WP2, as well as D15 and D29 of WP4). Thirdly, Sara Tonelli (FBK) explained the potential of the Hatemeter platform in supporting NGOs in the prevention and fight against Islamophobia online, its main features, and the experience of the NGOs participating in the Hatemeter project in testing the aforementioned platform (see the already submitted deliverables D8-D11 of WP3, as well as D15 and D29 of WP4).
Fig. 4 - Public conference. From the left: Franco Vitale (Mayor of Rosolina – Rovigo, Italy), Michele Lionello (Head of the organising team of “Voci per la Libertà – Una canzone per Amnesty” and Amnesty International Italy activist), Roy Paci (Hatemeter Testimonial and Amnesty International Italy Award 2019), Riccardo Noury (Amnesty International Italy spokesman, at a distance), Francesca Cesarotti (Amnesty International Italy), Elisa Martini (UniTrento), and Sara Tonelli (FBK).

Furthermore, Gabriele Baratto (UniTrento), Serena Bressan and Marco Guerini (FBK), Chafika Attalai (CCIF), and Bill Howe (Stop Hate UK) also participated in the public conference. During the social dinner scheduled after the end of the conference, they provided along with the speakers, further information on Hatemeter to the several participants interested in the project (networking activities; see also Hatemeter Information Desk below). Around 100 people (e.g. journalists, human rights activists, and general public) attended the conference and the social dinner (see Fig. 5 below).
3.2 Hatemeter information desk

Members of Hatemeter ran an information desk during the last two days of the festival (20th and 21st of July 2019) distributing informative materials on the project. Hatemeter partners illustrated the preliminary findings of Hatemeter. Further promotional activities were carried out during the participation in the Festival such as public advertising (both online with more than 37,000 views only on the Facebook event, and on the territory), networking and press releases (see Fig. 6, Fig. 7, Fig. 8 below).
Fig. 7 - Information desk of project Hatemeter and promotional activities #2.

Fig. 8 - Information desk of project Hatemeter and promotional activities #3.
Finally, Hatemeter partners prepared dedicated promotional materials: 1 banner (5x1), 1 roll-up (1x2), posters, flyers and project t-shirts. Both Hatemeter partners and NGOs activists wore the Hatemeter t-shirts during the event (see Fig. 9 above).

3.3 Presentation of the project on the main stage

Project Hatemeter was presented on the main stage of the “Voci per la Libertà – Una canzone per Amnesty” festival in Rosolina Mare (Rovigo, Italy) to an audience of around 600 people before the performance of Roy Paci (Hatemeter Testimonial and “Amnesty International Italy Award” 2019) both during the last evening of the event (Sunday, July 21, 2019) and the days beforehand.

Specifically, Elisa Martini (UniTrento) and Serena Bressan (FBK) illustrated the aim of the project and its main preliminary results during an interview with the “Voci per la Libertà – Una canzone per Amnesty” presenters, while Francesca Corbo (Amnesty International Italy) described the work of the NGOs operators and activists during the Hatemeter platform piloting activities (see Fig. 10 and Fig 11 below). In particular, the Hatemeter platform v.1 has been piloted and tested from January to March 2019 with the three NGOs involved in the project, namely Amnesty International Italy, Stop Hate UK and CCIF - France in EU MSs where the magnitude of the problem is substantial but no systematic responses have been implemented: France, Italy and the United Kingdom. Currently (June-September 2019), the NGOs operators and activists are testing the second updated version of the platform in the three pilots (see WP4). At least one representative of each NGO involved in the project participated in the dissemination event in Rosolina Mare. At the end of the event, the Hatemeter Testimonial Roy Paci performed his songs during the final concert (see Fig. 12 below).
Fig. 10 - Presentation of Project Hatemeter on the main stage on Sunday, July 21, 2019. From the left: Elisa Martini (UniTrento) who is wearing the Hatemeter t-shirt, and Serena Bressan (FBK).

Fig. 11 - Presentation of Project Hatemeter and of the activities of the NGOs operators and activists testing the Hatemeter platform by Francesca Corbo (Amnesty International Italy) on the main stage on Saturday, July 20, 2019.
Fig. 12 - Performance of Roy Paci (Hatemeter Testimonial and Amnesty International Italy Award 2019) on the main stage on Sunday, July 21, 2019.
4. Hatemeter awareness raising campaign shooting

Based on the results of Project Hatemeter, an awareness raising campaign (in English, France, and Italian) aimed at preventing and combating online hate speech against Muslims is being prepared by UniTrento and the 3 NGOs involved in the project, with the support of the Hatemeter SSH and ICT researchers. In particular, we are producing a video-debate between partners, stakeholders and the Hatemeter testimonial Roy Paci, as a musician and artist committed to preventing and combating any adverse human rights impacts, to reach different target groups in the three pilot countries (France, Italy, and the UK) and also at the EU level, thus inspiring viewers to take action and partake in raising awareness of the phenomenon.

Video footage has been captured at the dissemination event "Voci per la libertà - Una canzone per Amnesty" ("Voices for Freedom – A song for Amnesty"), which in 2019 has been dedicated to the Hatemeter project and to the fight against Islamophobia (see Fig. 13 below). The Hatemeter dissemination event took place in Rosolina Mare (IT) on July 20-21, 2019 (https://www.vociperlaliberta.it/) with the participation of the Hatemeter partners. The editing phase of this video is in progress (D22 at M23 within WP5). This awareness raising campaign will be disseminated not only in France, Italy and the UK but also within the other EU MSs, using social media, the Hatemeter website and the communication channels of the Partnership members. It is designed on the basis of the project results and counter-narrative framework (WP2-WP4).

Fig. 13 - Screenshot of one of the main scenes of the Hatemeter awareness raising campaign portraying a Muslim prayer at dawn.
4.1 Awareness raising campaign storyboard and interviews

**Awareness raising** is a fundamental component in tackling hate speech. To design our awareness raising video, we followed a two-fold approach: fostering communication and information exchange, in order to improve mutual understanding as well as mobilising governments, organisations, communities, individuals and thus the society as a whole, to start acting on preventing and combating Islamophobia online. Amongst awareness raising activities, video campaigns are recognised as the most efficient and effective means of communicating information, especially when directed at the general public. Our target audiences include not only the general public and social media users, but also policy makers and intermediaries such as NGOs, education specialists, LEAs, social workers, ICT and media professionals and volunteers.

The **overall aim** of the Hatemeter campaigning against anti-Muslim hate speech is mainly focused on raising awareness of the issue of Islamophobia online in several countries and encouraging the audience to take up their role in tackling the issue through interviews, a video-debate and visuals (see D22 at M23 within WP5). We will also include key statistics in our video that clearly resonates with (the emotions of) the audience and therefore draws their attention. Our video will be in English, French and Italian with subtitles in each language, in order to reach a wide-ranging audience. Specifically, we interviewed and filmed the main protagonists of the Hatemeter project (both NGOs operators and SSH/ICT researchers from France, Italy, and the UK), as well as the Hatemeter Testimonial (see below): 1) Gabriele Baratto and Elisa Martini (UniTrento; Fig. 14); 2) Chafika Attalai (CCIF; Fig. 15); 3) Bill Howe (Stop Hate UK; Fig. 16); 4) Francesca Cesarotti (Amnesty International Italy; Fig. 17); 5) Sara Tonelli (FBK; Fig. 18); 6) Roy Paci (Hatemeter Testimonial; Fig. 19).

Fig. 14 - Screenshot of the video interview to Gabriele Baratto (UniTrento) that will be integrated into the awareness raising campaign.
Fig. 15 - Screenshot of the video interview to Chafika Attalai (CCIF) that will be integrated into the awareness raising campaign.

Fig. 16 - Screenshot of the video interview to Bill Howe (Stop Hate UK) that will be integrated into the awareness raising campaign.
Fig. 17 - Screenshot of the video interview to Francesca Cesarotti (Amnesty International Italy) that will be integrated into the awareness raising campaign.

Fig. 18 - Screenshot of the video interview to Sara Tonelli (FBK) that will be integrated into the awareness raising campaign.
The Hatemeter partnership will use a combination of methods and channels to promote the video campaign, when ready to be disseminated. We will use YouTube, Facebook and Twitter, the project website and our partners’ communication channels, including newsletters, websites and social media, to spread the message about the campaign. We will ensure that monitoring and communication are integral to the success of our campaign. In this way, we can update our audience with the results and engage those who, as yet, have not been motivated to take action to become part of the active movement the campaign has generated thus far. For instance, we will measure the successes of the campaign through:

a) Traffic to the Hatemeter website;

b) Number of people who followed us on social media;

c) Number of people who shared the campaign on social media;

d) Number of views that the video received;

e) Number of testimonials from high-profile supporters saying they support the campaign;

f) Number of articles/appearances in media and their reach (i.e. readership, viewers);

g) Number of telephone or email enquiries we received as a result of the campaign. The Hatemeter video campaign will be ready for dissemination in Autumn 2019.
5. Press review

The following is a summary of the main news, posts, video and radio podcasts published on the dissemination event “Voci per la libertà – Una canzone per Amnesty” and on Hatemeter before and after the event. These are pieces of news published by local and national press in Italy and by partners’ communication channels (see links and Fig. 20 below, as an example).

Meals and accommodation
Please note that both meals and accommodation will be paid by each partner, under its own Hatemeter travel/subsistence budget. “Voci per la libertà” will offer two pre-dinner aperitifs and buffets on July 20 and July 21, as well as beverage during the day.

Getting there
BY CAR
You can get detailed driving directions at the following links:
1) From Trento: https://goo.gl/maps/jf495u68tMvfgYNH8
2) From Rome: https://goo.gl/maps/xt2MzzS2TERbortN8

BY AIRPLANE + TRAIN
The closest airport is the international airport of Venice (VCE – Marco Polo): http://www.veniceairport.it/en/. It is about 2 hours by train from Rosolina Mare (1 hour by car). The Venice airport is well connected to the city by public transportation lines and to the railway station in Mestre (http://www.veniceairport.it/en/transport/venezia-mestre-station.html).
From the Mestre railway station, please take the train to reach Rosolina (train timetables and fares at http://www.trenitalia.com/tcom-en). Then, would you be so kind to contact us.
